

Automated Door Systems

Gate Automation

OVERVIEW

Gate Automation

As security and access now command a more significant consideration, so the demand for installations of electric swing or sliding gates is growing fast. In terms of safety and controlled access the equipment has to be right, whilst at the same time enhancing both the appearance and value of the property. That's why gate automation needs to be wide ranging with each system able to open using a variety of controls: radio transmitter, by remote, digital, keypad, key operation, timed operation, photo call loop detector and both audio and video entry systems. Hand wired, wireless, GSM and BT Phonenumber operated intercom systems are all now available.

Remember, an electronic gate not only improves home and personal security, but adds prestige and value to a property.
