

Automatic Doors – New Doors/Retro Fits

Wide-Range of Doors

We offer a wide range of new automatic doors in composite, aluminium and UPVC compositions. Fully customisable to each clients liking with a choice of colours, furniture and glass patterns.

Low Aluminum Threshold

All new doors will come equipped with a low all threshold as standard, additionally we do have a range of easiaccess ramps that are easy to install and give customers smoother accessibility through their doors.

Winkhaus AV2E Lock

Every new automatic door we supply is pre fitted with a automatic multi-point locking system. A police preferred lock that meets the 'Secure by Design' initiative for security. Simply by pressing the fob or wall switch the door will automatically unlock for the recipient.

SCAN ME FOR A EXAMPLE

Overview -

Whether your looking to automate your current door or for a new door, ADS can accommodate both request as long as the door is suitable for said automation it can be done by highly trained engineers.

We have different automatic systems to accommodate requests and siutations for example for just unlocking only purpose i.e. when a fob is pressed the door will unlocking via automatic multipoint lock or electric strike depending on what's already installed on the door or you would like us to install. The differnece between unlocking only and fully automated is the latter simply has a automatic operator which will open the door as soon as the motorised lock engages.
